McGregor's Year Book

This new Year Book, our silent salesman, comes to you offering at manufacturers' and growers' prices, the stock of one of the largest plant-producing establishments in the United States—offering something for every gardener, everything for some gardens. Years of experience in packing plants has resulted in methods enabling us to guarantee their safe arrival, and in the years of our business career our products have found their way into every state and territory and into many foreign countries. For over 40 years we have pleased the flower lovers of America, and the business today is under the direct control of the founders and their sons. Our guarantee is an asset with us and a safeguard to you, giving absolute security to mail order buyers.

Why We Can Save You Money

Our goods are grown in large quantities for wholesale purposes. Our retail prices are based on our large production, giving our retail customers an easily appreciated advantage.

Comparative Value of Roses

Don't think any Rose too small to do well. The roots of one-year plants being carefully protected in pots, permits of the shipping and successful planting anywhere. If you wish the largest and best Roses for quick effect, then Roses of the two-year size from four to five-inch pots are to be recommended.

Advantage of Pot Grown Roses

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of earth contains all of the fibrous roots, and when the plants are shipped in pots can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. The pot-grown Rose, therefore, has many advantages over other Roses.

Instruction Leaflets

On different pages in our catalogue we offer leaflets giving full cultural directions on practically all of the different classes of Plants that we sell. Offering leaflets in this way we are not compelled to ask from those who purchase a limited number of articles a large price for a complete book of instructions. The leaflets are carefully prepared and will be found to contain important and valuable information on the growing of subjects they cover.

If You Wish Orders Held

Be sure to say so, then we can book your order until any later date desired; otherwise we assume order is wanted at once, and for shipment without further instructions.

Postage Stamps

These can be sent for fractional parts of $1.00, or when postoffice orders can be sent by parcel post. Order, however, by mail, only such items as will permit the removing of the soil from the roots. (Postage table—Page 2).

Our Nursery Department

is separate and distinct from our greenhouse, and it is necessary, therefore, that all items from this department (page 96) be shipped direct from our nursery under separate transportation charges.

Premiums

Our terms being cash with the order enables us to give additional plants, bulbs, and seeds was four pounds. As soon as the plant becomes established in the soil it begins to send out strong shoots, each of which is crowned with a shapely bud. Before the season is over it will be grown by all cut-flower growers over the country. It is a Rose for every garden of every American home. The World Famous
Boston Fern

“No Single Decorative Plant Has Ever Proven More Popular”

The Grand New Dwarf Fern

“Teddy Jr.”

This magnificent Fern is a sprout from the now famous Roosevelt Fern, and while it produces a shorter frond it retains all the valuable characteristics of the parent. Fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds to their charming decorative effect. It is such a compact, vigorous grower that it will thrive under most adverse conditions. Price, nice young plants, 23¢; 3 for 65¢; larger plants, 50¢, 3 for $1.40; the heavier plants, $1.00, $1.50, $1.75 and $2.00.

Price, nice young plants, 25¢; 3 for 75¢; larger plants, 50¢ each; 3 for $1.43; 12 for $4.80. Extra large plants, $1.00 each; 3 for $2.85; $9.60 per dozen.

The Ideal Plumed Fern

Scholzeli The Ideal Plumed Fern

With the recent introductions of Ferns which have come from the original Boston type, there is no variety with heavier and more plummy fronds than Scholzeli. Its foliage is quite different from all other varieties of the family, and stands, in a class by itself. The plant makes a comparatively dwarf compact growth, the fronds, while dense, firm and rigid, are still graceful as the illustration shows. The foliage is also of a darker green than the original Boston Fern. All in all, it forms an ideal plumed Fern, possessing all the merits of former introductions while having a distinctive character that makes it of special value. Price, nice young plants, 25¢ each; stronger plants, 50¢ each; larger plants, $1.25 each; heavy selected plants, $1.75 and $2.50.

Japanese Lace Fern
One of the Most Beautiful and Popular Foliage Plants of the Century. A Decorative Plant of Unusual Value. (Asparagus Plu mosus)—

The family of Asparagus plants comprises a number of varieties. Some are climbers, some draping or trailing, some erect and bushy. Many of them are highly prized for their beautiful and graceful foliage, and the two varieties which we list on this page are practically the most popular and valuable of all. The variety Plumosus (Asparagus Plumosus Nanus) is a tall climbing decorative plant and one of the rarest and of delicate beauty. Its bright green foliage is extremely fine and plume-like. The fronds grow from six to eight inches in width and when cut retain their color and shape for weeks. The plant may be grown as a pot plant, a bushy form or climbing. Asparagus possesses the advantage of being more graceful and its foliage finer than those of the most delicate Fern. As a house plant it will thrive under practically all conditions. The Asparagus likes a good rich soil and fairly warm temperature. The plant does best and carries the richest color of foliage when it is kept in a growing condition through a plentiful supply of nourishment. Nice plants, 26c each; 3 for 78c; $2.50 per dozen. Stronger plants, 38c each; 3 for $1.08; $3.65 per dozen. Larger plants, 50c; 3 for $1.60; $5.66 per dozen.

The Wonderful Hardy Climbing Rose

Climbing AMERICAN BEAUTY

"A hardy Climbing Rose which in size of flower, color, form and fragrance is equal to its parent, the grand cut-flower Rose, American Beauty."

SOFT GLOWING RED

(32c)

(Rosy June blooming.) Climbing American Beauty, the new porch Rose, gives us a new Rose of wonderful beauty and merit. It is a cross between the world famous cut-flower Rose, American Beauty, and an unnamed seedling. It is an American production, the product of American Rose growers. It is perfectly hardy, strong growing, making canes from 15 to fifteen feet in a season, a perfect mass of bloom in June and produces flowers occasionally all through the growing season. The foliage is large, bright, glossy green, and never shows signs of any of the diseases that affect Roses. The color is a soft, glowing red, identical with its pollen parent, the American Beauty, and with the same exquisite fragrance; a quality not found in all climbing Roses. The flowers are of a size three to four inches in diameter, finely formed on long stems, and are produced in great profusion. This new Rose will bloom in almost any situation where a climbing or pillar or porch Rose is desired. It is one of the early Roses to bloom in the spring, coming into flower the latter part of May and the early part of June and continuing in full flower for a long time. Success beyond expectations has been found in producing a climbing Rose of the same color, size of flower and fragrance of its pollen parent, the American Beauty, with the addition of better foliage and blooming qualities; one plant producing twenty times as many flowers in June as the American Beauty bush Rose.

SOFT GLOWING RED

Dwarf fruiting variety, which is suitable for pot or culture.
